

# NOTICE OF HARM AND TO CEASE AND DESIST

## NOTICE OF PERSONAL LIABILITY IN WRONGDOING FOR ALL INDIVIDUALS, ADMINISTERING THE CO-VID 19 GENE THERAPY/VACCINATION.

To: Administrators of COVID-19 Vaccine/Genetic Therapies

October 2024

**Dear Gene therapy/Vaccination Administrator (hereafter 'you'),**

**Re: Notice of Harm and to Cease and Desist**

On behalf of living men, women and all their sons and daughters living right now and those yet to be born on Earth, **we hereby place 'you': any person administering the Covid 19 vaccination on notice that:**

**Actions carried out in your capacity of Vaccination Administrator during Covid-19, including but not limited to:**

- **misleading patients about the safety and efficacy of the 'covid-19 vaccine' or any associated risks;**
- **misleading patients by providing insufficient information including no safety data sheet for the vaccine therefore the risks were/are not fully explained to patients who were/are not able to give; informed consent.**
- **misleading patients by dispensing experimental gene therapy (GMO) products incorrectly labeled as a "vaccination", approved for use, through emergency authorization instead of rigorous medical trials;**

**resulted in a massive loss of life, extensive physical harm, distress and trauma to humanity.**

During the pandemic, the government declared a non-existent medical emergency, and you supported/support this deception, dispensing insufficiently tested SARS-CoV-2 genetically modified organisms (GMOs) falsely labeled 'vaccines' being also gene therapies, and profited from it.

You also support/supported and profited from the unscientific masking protocols, and ineffective and fraudulent PCR and RAT tests that were subsequently used to create false 'casedemics' in order to justify unlawful 'lockdowns', business closures and house arrest.

**We demand that, with immediate effect, you cease and desist from administrating SARS-CoV-2 genetically modified organisms (GMOs) and any further actions that would involve false and fraudulent communication to your patients, resulting in further instances of the kind of catastrophic outcomes outlined above.**

### **Notice upon Personal Liability**

**We also put you on notice that failure to cease or desist from continued or repeated involvement or implication in the above harms shall render you liable in your personal capacity.** As a person, you can be investigated for criminal conspiracy, crimes against humanity, aiding and abetting corporate manslaughter, murder and genocide of the human population through early onset disease and sterilization resulting from the *SARS-CoV-2 genetically modified organisms (GMOs)*.

Further to the above Notices, and in order to clarify our position, may we take this opportunity respectfully to remind you of your own moral responsibilities, to first do no harm.

As early as 2021, international experts were cautioning against the novel Covid strategies recommended by the WHO Covid team, especially but not limited to the experimental modRNA medical technologies developed at 'warp speed' to function purportedly as vaccines. Vigibase, the WHO pharmacovigilance collaboration with the University of Uppsala, holds records of over five million (5,000,000) people worldwide suspected of harm due to the Covid-19 genetic 'vaccines'.

### **Consequences of the WHO Covid Policies, Recommendations, Advice and Omissions**

#### **1. Immeasurable suffering and death**

In the past four years, billions of people who trusted and complied have experienced ongoing physical and mental suffering, illness, disability, loss of income, poverty, child abuse, other violence and death as a result.

## **2. Human rights violations**

Severe emergency measures consequently resulted in widespread violations of fundamental human rights. Living Men and Women, Boys, girls and babies were masked and injected. Those expressing, or wishing to express their right to free speech, travel, bodily autonomy, and to choose, were threatened, intimidated, coerced, neglected, abused and in some cases assaulted, imprisoned or killed.

## **3. Failure to recommend inexpensive, safe and effective treatments and remedies for Covid-19**

Covid-19 can be effectively treated with safe and established multi-purpose generic medicines, including ivermectin and hydroxychloroquine, in combination with zinc, vitamin D, vitamin C, and other immune-boosting, health-promoting and anti-coagulant treatments. Failure to disclose and raise awareness of these, and failure to recommend ivermectin widely in combination with zinc for early use, meant that millions of people suffered and many died as a result of not being offered effective early and late treatments. Thus, in your personal capacity, the world's people may hold you responsible for the consequences of serious omissions related to safe, effective treatments for Covid-19, in preference for undisclosed GMOs.

## **4. Dangerous GMO gene therapies deployed in the guise of vaccines**

You may also be personally liable for death, loss and suffering in relation to the SARS-CoV-2 'vaccines' as you have not advised people of the following:

The long-term material risks of these 'vaccines' are unknown. The LNP-modRNA platform fulfills EU, UK, South African, Australian, and US legal definitions for being properly deemed a genetically modified organism (GMO), and a gene therapy, where material risks are identified over a period up to 15 years and perhaps into offspring. People were not advised as required by law that the so-called 'vaccines' are, in fact, GMOs.

Pfizer used one process to manufacture the products that they submitted for approval but a different process to manufacture the product supplied for injection into the world's people. The latter product was manufactured using E.coli bacteria and plasmid DNA which has resulted in excessive synthetic DNA contamination confirmed as able to integrate with the human genome. Moderna's use of plasmid DNA in manufacture has also led to excessive synthetic DNA contamination.

Pfizer products include a SV40 virus-derived enhancer gene sequence. This gene sequence is known to facilitate the transport of the synthetic DNA into cell nuclei, posing a real risk of chromosomal integration. This threatens permanent genetic modification of inoculated people without their knowledge or consent and can only be harmful.

The contents of these genetic injections do not stay in the arm muscle.

Spike proteins are produced for a prolonged and unknown period of time, possibly indefinitely.

These spike proteins trigger extensive micro-vascular blood clotting as well as large vessel blood clots.

Spike proteins are deposited in many tissues and organs including the heart, brain, testis, ovaries, liver and spleen, causing tissue degeneration and disease.

The large quantity of spike proteins may overwhelm the immune system, causing immune system dysfunction and worsening risk of all infections and cancers.

The spike protein is toxic in itself, but this foreign antigen also marks the victims' own tissues as non-self, triggering autoimmune disease within these tissues.

The antibodies generated are non-neutralizing and worsen Covid disease; this is "antibody dependent enhancement" of infection.

Undeclared plasmid DNA in these products carries further dangers; especially in the case of Pfizer and the concealed SV40 enhancer and promotor sequences. This includes the disruption of tumor suppressor genes, and adds to the list of mechanisms by which these products increase cancer risk.

The artificial modRNA in these products is hyper-persistent due to the substitution of N1-methylpsudouridine in place of uracil. This prolongs the production of the toxic spike proteins, but also causes ribosome frame shifting, such that a variety of unpredictable proteins and polypeptides are also generated. These pose serious risk for triggering a large spectrum of autoimmune diseases.

Additionally the pegylated lipid nanoparticles, which deliver the genetic payload into the victims' cells, are toxic in and of themselves.

## **5. Violation of informed consent**

People around the world trusted that Covid-19 GMOs and gene therapies were “*safe and effective*”. This claim cannot be substantiated and is further disproved by Covid-19 vaccine contracts. As such, the right to free and informed consent was violated for every human being who was injected with the experimental Covid-19 GMO Gene Therapy called ‘Vaccine’.

In addition, it appears you did not inform people of the risks associated with these experimental GMO injections, nor have you shared any injury reports with the public. You simply failed to seek independent, transparent, and trusted, timely analysis of the data.

This is in direct contravention of the Nuremberg Code, that was agreed to in 1948, preventing non-consensual medical experimentation on human beings, following gross human rights violations during the Second World War.<sup>2</sup> Your failure to advise on, recommend, promote and ensure free and informed consent for these Covid-19 GMO gene therapies can be prosecuted for both breach of your duty of care as well as for battery.

It is our opinion that the health of the World’s People is much poorer for your actions during the course of your work as a *SARS-CoV-2 genetically modified organisms (GMOs)/vaccine* administer.

### **In the interim and in future, we demand that you**

- 1. Halt the Covid vaccination program including any vaccines containing the LNP-modRNA platform,**
- 2. Quarantine for destruction all poisonous stock held, and**
- 3. Cease and desist from spreading disinformation about Covid-19 GMO gene therapy products, all with immediate effect.**

Written on behalf of  
the Men, Women and Children of the World (including your friends and family)

In truth, for justice, accountability and the survival of our human species!

---

Original Notice of Liability addressing both corporate and personal liability in wrongdoing was delivered by Swiss solicitor Philipp Kruse in person to: Tedros Adhanom Ghebreyesus, Dr Maria van Kerkhove, Dr Janet Diaz and Jeremy Farrar at the WHO headquarters on Monday the 6<sup>th</sup> May 2024.

*“The WHO and its employees can no longer say they are ignorant of the issues and public concerns. Here is the signed receipt of the documents” -- Philipp Kruse*

The Original Notice of Liability was written by specialists in health, scientists and international lawyers Philipp Kruse, Julian Gillespie, David Adelman and many other members of the World Council for Health.  
*“This is an international collaboration toward truth, justice and accountability!”*

**World Council for Health - Steering Committee**
